Marine Risk Engineering

By its nature, cargo and ships are exposed to a variety of risks during transit and before reaching their final destination. AXA XL's marine risk engineers offer their expertise and loss prevention services within the maritime sector for various type of cargo, commodities, hull and machinery. We've got what it takes to find answers to protect your goods, whether they are around the corner or around the world. Businesses that are moving the world forward choose us as their partner. Because we analyze the numbers but listen to their dreams. Because we're reliable and fast. Because we're experts in our field, but always open to new possibilities. And because we make top service and fast, fair claims handling our priority.

Service focus

Flexibility

We offer customized risk management solutions to meet your specific insurance and organizational needs.

Transparency

In order to support your existing risk management philosophy we first determine requirements and priorities with you and your insurance broker. In this way, we can ensure consistency throughout the risk management process.

We share all relevant data gathered during risk assessments and surveys with you and your broker, and support you in auditing the effectiveness of the measures taken upon mutual agreement.

Collaboration

By working closely with you, we aim to achieve comprehensive, effective and mutually agreeable risk control schemes. Our approach focuses on individual performance rather than standard prescriptive measures.

Expertise

Our marine risk engineering services are managed and coordinated by in-house experts who can also rely on the support of experienced external service providers.

Our capabilities include, but are not limited to:

- Providing technical expertise to proactively manage risks across wide range of logistics services
- Reviewing fleet and operation practices for hull & machinery risks (i.e. JH2013/007)
- Providing in-depth claims analysis, frequency, trends and patterns
- Generating loss prevention reports with recommendations
- Managing field attendance such as:
 1. Loading and Discharging surveys (including float on/off)
 2. Towage approvals
 3. Condition and suitability surveys of floating assets
 4. Builder risk surveys JH143
 5. Stock Throughput/warehouses and logistics centers survey
 6. Marine Liabilities related surveys

Extended services

Service excellence is the key to all areas of AXA XL's business. Upon special agreement with you, we can offer you the required support and expertise to shape risk management procedures related to your transport operations, such as the following:

- Risk assessment of the entire supply chain
- Risk mapping and benchmarking of your logistic platforms
- Supporting your efforts in complying with international transport and security regulations
- Providing assistance to develop best practices
- Attendance at kick-off and risk management meetings
- Reviewing of method statements and transportation manuals for project cargo risks and renewables
