Property

- Construction and Engineering
- Property Catastrophe
- Property Facultative
- Property Treaty

Specialty

- Aviation and Space Treaty
- Health Reinsurance
- Marine, Energy and Whole Account
- Trade Credit, Surety and Political Risk

We're not just a reinsurer

We have a client-focused mindset and an active client management programme with single points of contact and a strategic approach to engagement; addressing challenges and identifying opportunities together.

We are proud that some of our clients have grown with us since we began underwriting more than 70 years ago. We will be here when you need us.

Our heritage as a traditional, underwriting-led reinsurer dates back to the 1950s. As our business has evolved, so has our strength and knowledge and we intend to keep growing and learning to help you manage the risks you see today and in the future.

Our people and our technical expertise are valued by the market and our clients. We are trusted to assess the most complicated of risks and are asked to quote on the majority of opportunities relevant to us.

We're part of AXA Group, a global financial institution, so we benefit from a strong capital position and AA - (S&P) and A+ (AM Best) ratings

That means you can depend on
us to meet our commitments to
your business.

We are ensuring our sustainability. We're selective about risk to
create a balanced portfolio, because that means we will be here
for you in the long term.

We believe that the (re)insurance industry can play a key role
in accelerating the transition to a resilient, net-zero emissions
economy in line with the 1.5°C target of the Paris Agreement.

As part of AXA, a leading thinker on climate risk, we have
access to the Group's resources including climate training for
all staff and the AXA Research Fund: a philanthropic initiative
whose mission is to support independent academic research
in key areas related to risk.

Reinsurance solutions

We are organized in three key regions:

■ North America

■ International

■ Bermuda

With a significant presence in all of the world's major reinsurance markets, we take pride in our relationship-driven underwriting; forward-thinking use of science and data; tangible climate change strategies, and a commitment to be there for the long haul.

A world map with three regions highlighted: North America in purple, Bermuda in pink, and International in teal. The International region covers Europe, Africa, Asia, and Australia. Small black squares indicate specific locations within each region: three in North America (USA and Canada), one in Bermuda, and several in Europe and Asia.
