

North America Construction

Protecting you

Our Construction Risk Engineering Services help you protect your property, profitability, and employees. Our dedicated risk engineering team offer superior project management, site safety, and operational management expertise to keep your business on track.

We help your organization identify the root causes of construction safety, defect, and management issues. Your account is assigned a dedicated Risk Engineering Account Coordinator, who works with Underwriting & Claims so that your customized insurance program includes the highest level of customer service.

Our risk engineering/mitigation services include:

- **Employee Development** – With our partner ERI Safety Video, we provide rapid delivery of relevant and timely safety meeting resource rentals, free for AXA XL clients.
- **Safety Data & Analytics** – We partnered with Predictive Solutions, a leading firm that offers software solutions (i.e SafetyNet) which help companies predict the likelihood, frequency and location of workplace injuries.
- **Driver & Fleet Safety Programs** – Communication in the construction industry is essential, but not while driving. Driver distraction is the leading cause of motor vehicle accidents*. Our risk engineers help you develop driver training and fleet safety programs that match your business needs and help you maintain DOT compliance. We can also offer your company access to the National Safety Council's online defensive driving course.
- **Online Safety Training** – Our partnership with ClickSafety®, a leader in on-line safety training for the construction industry, delivers up-to-date content and helps you manage employee compliance training and development. Online delivery of OSHA 10 and 30-hour Programs and EM385-1-1 training minimizes travel costs, giving you the flexibility to complete the coursework you need.
- **Project Consultation/Assessments** – Consultants identify safety, health, and general liability exposures, helping you avoid additional costs or project delays. We can assess general conditions or give you a customized, issue-specific assessment.
- **Risk Resource** – This Internet-based portal delivers vital risk management and safety information to your team at their desks or in the field. Full of useful tools and strategies, Risk Resource helps keep your people safe, healthy and productive.
- **Safety Compliance Training** – Your workforce needs the best training available. Our vast network of consultants help you develop your training program or deliver training to you in the most cost effective manner. We team with top Subject Matter Experts to bring you the best safety training available. You'll work together with your risk engineer to build a customized program that matches your company's needs.
- **Thought Leadership** – Keep current on risk exposure topics, best practices, and regulatory changes affecting your business and industry. Our team's thought leadership, including our Construction Insider newsletter, helps you gain insight into mitigation solutions that help you solve even the most complex risks.

For information about any of these risk engineering services, please ask your Account Coordinator.

AXA XL provides loss prevention and risk assessment reports and other loss prevention services, as requested. Documents created by AXA XL including reports, letters e-mails, publications, etc. are based upon conditions and practices observed and the data made available at the time of its collection. AXA XL's personnel, publications, services, and surveys do not address life safety or third party liability issues. Any services addressing life safety or third party liability are provided by others. This document shall not be construed as indicating the existence or availability under any policy of coverage for any particular property or type of loss or damage. The provision of any service does not imply that every possible hazard has been identified at a facility or that no other hazards exist. AXA XL does not assume, and shall have no liability for the control, correction, continuation or modification of any existing conditions or operations. We specifically disclaim any warranty or representation that compliance with any advice or recommendation in any document or other communication will make a facility or operation safe or healthful, or put it in compliance with any standard, code, law, rule or regulation. If there are any questions concerning any recommendations, or if you have alternative solutions, please contact us. Save where expressly agreed in writing, AXA XL and its related and affiliated companies disclaim all liability for loss or damage suffered by any party arising out of or in connection with this document, including indirect or consequential loss or damage, howsoever arising. Any party who chooses to rely in any way on the contents of this document does so at their own risk. AXA, the AXA and XL logos are trademarks of AXA SA or its affiliates. AXA XL is a division of AXA Group providing products and services through four business groups: AXA XL Insurance, AXA XL Reinsurance, AXA XL Art & Lifestyle and AXA XL Risk Consulting. In the US, the AXA XL insurance companies are: AXA Insurance Company, Catlin Insurance Company, Inc., Greenwich Insurance Company, Indian Harbor Insurance Company, XL Insurance America, Inc., XL Specialty Insurance Company and T.H.E. Insurance Company. Not all of the insurers do business in all jurisdictions nor is coverage available in all jurisdictions. Information accurate as of November 2018. © 2018 AXA SA or its affiliates
